2.0 Technical Aspects of the Audit and Changes

This section of the Report seeks to identify significant technical or business changes to the Client, that may effect the certification scope, the manner in which the audit was conducted, or is to be conducted for the future, which may effect the audit duration.

2.0.1 The Client's Fundamental Processes:

The auditor is ONLY defining the Client's Fundamental Processes or Departments that the client refers to in their management system (i.e.: functions in the standard such as Management Review, is a Management Process and is recorded else where). The auditor may further clarify a Client's fundamental process name to aid programme activities e.g.: if reference is made to Manufacture in a general engineering company, the auditor may expand its reference by stating Manufacture - cutting, Manufacture - Painting. The auditor is responsible for "building" the fundamental processes for the 3 year certification programme; as well as showing which fundamental processes have been seen in the individual audit plan for this visit.

4.0 Audit Team Summary, Recommendations and Conclusion

4.0.1 Audit Team Summary

The surveillance audits that have been conducted cover all relevant processes, divisions or departments, as well as related documents. Audit sampling is based on identification of risks, application of appropriate controls and assessment of relevant monitoring records.

The statement of scope, having a clear self-interpretation of what the company's products/services are, as well as a clear definition of the company's business that even a layperson can understand.

The Management has demonstrated their commitment to the Management System by providing resources, such as training and personnel competence, establishing and communicating the Policy and Objective/ KPI, and regularly reviewing their target achievement, as well as chairing Management review meetings and other coordination meetings.

Controls for the management system have been properly established, documented, and implemented. The corrective action system, internal audit system, and management review system are all part of it. When any discrepancy is discovered for any issue, including at operation, support process, incident, or unachieved objective/ target, all department leaders are aware that a corrective action plan must be in place. The criteria for an improvement system has been met.

There are no NC/ Major and D/ Minor findings being issued in this audit. The PNC are recorded as management system improvement notes on the corresponding page below. As a result of this audit, the conformance and effectiveness of the organization's management system were confirmed. We recommend the continued registration certification status of ISO 14001:2015 to this organization.

6.0 Comments Raised

OFI = Opportunity for Improvement - An area noted in a process that the auditor is aware that potential improvement can be made within the said process.
PNC = Potential Non-Compliance - An area where the auditor has not fully audited the process (e.g.: a new change has been introduced to a process) but is aware that the process is not fully compliant.

Number	Description of Comment	Comment Type
--	Site Baros	--
1	The organisation has identified aspects of environmental impact e.g. waste accumulation, noise. However, it is necessary to add grey waste and black waste along with appropriate regulatory references that relate to the environment rather than OHS.	PNC
2	The organisation has managed black waste by cooperating with PNP- Perumda Tirtawening Kota Bandung. Agreement No. HK.03/139/PNP.PLY/VIII/2023 has been shown. However, it is necessary to improve the scope of the agreement to include the Baros site.	PNC
--	Site Industri	--
3	The organisation has provided spil kits in the hazardous waste temporary storage area. However, it is necessary to improve the placement of the spil kit including the marking of the spil kit.	PNC
4	The organisation has identified environmental aspects and impacts periodically. However, it is necessary to establish a life cycle perspective to facilitate the identification and control of environmental aspects and impacts.	PNC
5	The organisation has established SOPs related to emergency response situations including earthquake, fire, hazardous and toxic spills, etc. The organisation has conducted emergency response simulations in June 2024 i.e. fire, earthquake, first aid in accidents. However, it is necessary to conduct emergency response simulations related to the management of hazardous and toxic materials Permen LHK No. 74/2019.	PNC
